

## SLA our service contract

ORIONtech Service and Calibration division are uniquely positioned to provide rapid deployment of any types of analytical equipment to meet clients' most demanding contract, dedicated team of service professionals complement ORIONtech impressive asset base.

Our breadth and depth of expertise and vast knowledge and experience enable us to provide our clients with innovative, practical and cost effective solutions to their service requirements.

## Service Contract Benefits

- Flexibility to suit your requirements
- Improved plant operation
- Increased plant productivity
- Improved system and plant reliability
- Reduced downtime
- Reduced cost of ownership
- Prolonged life span of instrument
- Access to our technical help line

## Commissioning and Compliance of Fixed Systems

We design, supply, install and commission analytical systems to suit all commercial requirements, which is not only environmentally friendly but also cost effective.

Installation of our analytical system is only the first step, however. Regular maintenance by our qualified technicians will ensure that your system remains efficient and in optimum condition. As a valued customer of ours, we will also advise you of the appropriate servicing schedule as recommended by the manufacturer of your system.

During the commissioning process, the transmitted signals and set point limits of the system are all tested with certified calibration gas or liquid standards to ensure that everything is in perfect working order. We also provide individually signed Calibration/Commissioning certificates on completion to comply with Israeli Standards Institute ISO-9001 : 2015. This certificate provides details including the before and after readings of the measured values, and highlights any recommendations for your system.

## In-house Servicing

Complete service facilities are available in our fully equipped Workshop, which is staffed by our trained Service Engineers. We are able to repair electronic, electrical and mechanical instrumentation in minimum turnaround time. We have a fully equipped state-of-the-art Gas Calibration Laboratory, used for calibrating gas detectors and analyzers. All of the calibration gases used are certified.

Certificates of Calibration can be issued for Quality Assurance purposes.

## WHY US?

- We have trained and competent technicians.
- We service all makes and models.
- We offer flexible service agreements to meet your business needs.
- We offer combination Analyzers and Gas Detection services.
- We are a local business who has served the customers for over 20 years.
